EVERLOCK

DIGITAL DOOR LOCK

GPC1 Touchpad & RF card door lock type

COLOR	Silver	Black	Chrome

Product Features

* **A touch sensor type, ultra-slim and noble design**
  It does not require you any motion as to lift up the product's cover.
  Just gently touch your password on the pad.

* **RF card keys (13.56MHz, ISO 14443A Type)**
  If your card has RF function (13.56MHz, ISO 14443A Type),
  then you can register it as your card to use the system.

* **Can support operational modes suitable for various users environments**
  You may set the desirable operation mode for your environment whether
  it is a general house or office.

* **Fire detection alarm sounds and automatic release of the locking device**
  It includes the fire detection alarm function. If heat above 60 degrees celsius
  is detected, then the alarm sound will be generated   and the door lock will
  automatically release the locking function.

* **Automatic locking function**
  It is automatically locked after you close the door. You will never leave your home without locking the door.

* **Antitheft and double locking**
  If you set the double locking function when you are inside, then no one can open the door from the outside.
  To the contrary, if you set the antitheft function from the outside, an alarm sound will occur as they open the
  door from the inside.

* **Override emergency cylinder keys**
  User can use an override cylinder keys in case of a circuit trouble.
